Roskilde to Stenløse

The European Long Distance path E6 from Greece to Finland passes through Algade the main street in Roskilde. This

description will start where facing east Algade passes Hestetorvet (The horse market) on the right.

Joining the route: From the station cross the road and walk down the square Hestetorvet. At the bottom turn right onto Algade.

After 200m and just before the railway crosses the road turn left onto Kong Valdemarsvej and then very shortly right onto Universitetsstien. This is also the pavement for Kong Magnusvej until that road turns to the left. Continue straight ahead parallel with the railway. Continue until the path becomes Solvænget. Ignoring the road to the left go forwards until reaching a T-junction. Turn left onto Præstemarksvej and then the second right onto Ternevej. At the T-junction turn left onto Gammel Trekronervej. This road runs parallel with the very busy Østre Ringvej. At the end of the path turn right onto Østbyvej and cross Østre Ringvej. Go straight ahead on Trekronervej and after 100m turn left onto Slæggerupstien. The wood to your left is known as ‘1000 Years Wood’! Just before reaching Herregårdsvej turn right onto a path. Cross over Nanortalikvej and continue along the path. On reaching a stream turn left. Do not cross the stream.

Upon reaching a road, Slæggerupvej, turn right and follow it for the next 3km. The local authorities are in the process of making a path that will bypass much of this road. When it opens it will be included here. Turn left onto the narrow Krogager road leading into the village of Ågerup. Just before the buildings start take a grass path to the left and follow it round past some buildings, the churchyard and church (#). At the end turn left and take the first right. Almost immediately turn left in front of a Fakta supermarket. Follow this road, Højgårdsvej until it becomes a path and crosses a cycle track and another path (Lindebjergstien).. Turn right and follow this path for 1.5 km where it turns left past

Lindebjerg School in Grundsøllille. Take the cycle tunnel under the road. Follow this up to the right onto Store Valbyvej.

Walk through the village and take the second left (Kirkerupvej). Follow this for 1.3km and turn right at the junction. Turn right again at Kirkerup Church. After 1.2 km take a track on the left down to the bird tower on Grundsømaglesø (lake). The Danish Society for the Protection of Birds have created a nature reserve for this area and have done much to give you a good experience. If you detour left at the bird tower there are paths cut into the reed beds so that you may view the birds at close quarters.

At the tower turn right and follow the path along the lake. The path turns right and divides into two parallel paths. Take either path and just before meeting Store Valbyvej there is a small exhibition with benches and tables. At the road turn left. Take the first left where there are signs for two

different farm shops 'Min Butik' and 'Bondegården'. Turn left again after 50m and pass through farm buildings past the farm shops. After passing between the last buildings the track turns northwards, crosses a stream and meets Østrupvej at a T-junction.

Almost opposite a road, Birkevang, forks northwards on the right. This starts as a gravel track, becoming a footpath until finally it becomes an asphalt road in the village of Østrup Holme. Take the second right and at the end turn right. Go straight across at the crossroads until you reach a T-junction with Holmevej. Turn left and after 350m, at a 'Put and Take' sign take the second right into Brohaven. After crossing Værebros Å (river) (#) the road becomes Blæsenborgvej. The path shortly runs between the railway and a golf course. You are on a shelf (#) above the railway. Follow alongside, but above, the railway for the next 2.5km until Marienlyst Slot (Castle). There are many ravines here so the path twists and turns a lot. You may go down to the railway and follow a path alongside it but the view is much less spectacular. When you come to Folkeferies main building follow the road to the right and at a stone with 'Feriebyen' on it turn left. After crossing the ravine turn left back to the edge of the shelf, turn right and when you have to turn right at the next ravine you may be able to see the remains of the now dry Ophelia Spring at the bottom of the ravine. On reaching Kronborgvej turn right. Kronborg Castle (#) can be seen in front of you. After crossing the railway you reach the Dancing Maids fountain (#). Cross the road (Allegade) and turn left past the Culture yards (#) and the inner harbour. Just opposite the Culture yards, the St. Mary monastery's garden wall is passed on the right. The Monastery is well worth a visit as is St Olai Church a little further down, set well back to the right. At the former Customs House (Toldkammeret) (#) cross the road to Helsingør station forecourt.
